# CLEANER ENERGY BIOFUEL

## REDUCE EMISSIONS WITH THE LOWEST CARBON INTENSIVE ENERGY AVAILABLE

Get access to a more sustainable shipping . Choose CLEANER ENERGY biofuel, our second generation biofuel, and reduce by at least 85% the carbon emissions generated by your shipments.

### YOUR BENEFITS

#### MEET YOUR CARBON-REDUCTION OBJECTIVES

Reduce your carbon footprint and your reach ambitious sustainability objectives.  
Cut your well-to-wake carbon emissions by 85% (on the whole fuel production and utilization cycle), and your tank-to-wake emissions by 100% (when considering only the moment it is used on our vessels).

#### RECEIVE AN OFFICIAL DECLARATION

Certify that these savings have been associated with your specific shipments thanks to an official declaration.  
The whole framework is compliant with ISO 14020, 14021 and 14067 and is verified by an independent third-party.

### GET STARTED

#### ASK FOR CLEANER ENERGY biofuel

During your online booking process select CLEANER ENERGY biofuel, contact your sales representative to start now or [ho.actservices@cma-cgm.com](mailto:ho.actservices@cma-cgm.com) to get more information.

### HOW DOES IT WORK?

We offer CLEANER ENERGY biofuel to all our customers, throughout all our services, implementing a Mass Balance Concept\*. This Concept is a way of diversifying our energy mix while keeping track of quantities and allocating them to specific traffics. You will receive a declaration, stating the quantity of biofuel used and its associated CO<sub>2</sub> savings.

*\* The whole methodology is detailed in a framework available on our websites.*

#### WHAT IS BIOFUEL?

The biofuel attributed is UCOME (Used Cooking Oil Methyl Esther), a second generation biofuel made from used cooking oils, that avoids impacting agricultural lands and forests.
